**Members Absent:** None

## Topics Discussed:

- We thoroughly discussed the structure and the main elements of the project by focusing more on the details.
- We discussed about the permissions, use case diagrams and sketches of the outlook of the pages.
- We talked about the project requirements that was the main topic of this week report. So by doing this, we had a better idea how Requirement file will be fulfilled in the upcoming weeks.

## Decisions Made:

- We decided that as for now the permissions will be: admin/manager, student, staff, guest, driver, bus, cars.
- We are going to use python and Django framework for the backend; JavaScript, HTML, CSS and Figma for the frontend and design of the website; SQLite for the database.

## Tasks Assigned:

- Updating the project requirements and uploading the document on a specific folder in GitHub.
- Joni drew some basic sketches for Student use-flow in the software, Estref drew the use case diagrams, Adri and Jasim will see in more detail the documentations of the languages we will use and Eridon will take care of the GitHub page as the repo master.
